

Dr. K's Winter Survival Kit

Keep your immune system in tip-top shape with our power-packed combination of anti-viral, anti-bacterial and anti-fungal nutrient supplements.

Lauricidin

- Assists in viral, fungal and bacterial infection, no need to wait for a diagnosis
- Works by disintegrating the membrane around the invading virus or bacteria.

Zinc

- This unique proprietary blend includes co-factors for enhanced absorption. An immune boosting nutritional supplement for any phase of your sickness.
- Supports enzymatic activity associated with energy metabolism, bone mineralization and tissue synthesis.

Sunny C-1000

- Exclusive patented **Sunny C-1000** formula does not suppress your immune system as most other Vitamin C products do.
- Inferior versions of Vitamin C can suppress your immune system for up to 30% for the first 4 hours. Sunny C-1000 increases natural killer cell activity beginning with ingestion.
- Unlike other Vitamin C sources, Sunny-C1000 is gentle to the gastrointestinal tract.

D3 Liquid

- Because it is, the best there is! Use it for prevention, boost your dose if you know you've been exposed, or "*Super K*" size your dose to shorten the duration of your illness.
- Vitamin D3 receptors are known to exist on most immune cells and play a role in immune cell maturity.
- Ask for **Dr. K's Recommended D3 Vitamin Dosage Chart** to keep your immune system strong all year long!

***Ask for our HealthQuest Radio Show on CD titled "It's a Snow Day"
