

D-BEST D3 LIQUID™

WITH VITAMIN K2

PRODUCT INFO SHEET

Description

D-Best D3 with Vitamin K2

- Supports Healthy Blood Circulation
- Promotes Bone Health and Proper Calcium Storage
- Supports Cardiovascular Health and Blood Sugar Balance
- Boosts Immune Function

What is Vitamin K2 with D3?

A growing body of research shows that when it comes to bone health, ensuring optimal intake of vitamin K is a critical piece of the puzzle. New research is focusing on the synergistic relationship between vitamin K (specifically, vitamin K2) and vitamin D3, especially in terms of bone strength and cardiovascular health. A group of naturally occurring and structurally similar, fat-soluble vitamins, vitamin K is essential for the proper utilization of calcium.

Through its activation of the protein osteocalcin, vitamin K helps to bind newly absorbed calcium to the mineral matrix in bone. In addition, vitamin K has been found to help maintain bone mineral density by decreasing the activity of osteoclasts, a cell that breaks down the bone matrix.

Vitamin K also provides critical cardiovascular protection by helping to carboxylate Matrix GLA Protein (MGP), an inhibitor of circulatory calcification. Thus, vitamin K and vitamin D not only share similar qualities but they also act synergistically with one another within the body.

D-Best D3 Liquid with Vitamin K2 utilizes a medium chain triglyceride (MCT) delivery system providing 10 mcg of vitamin K2 (as MK-7) and 1000 IU of vitamin D3 per serving. Natural Medium Chain Triglycerides have unique physical properties which allow them to be readily absorbed without additional emulsifying agents. MCT's are a great way to deliver pure, tasteless, and odorless liquid vitamin K2 and D3 that can be combined easily with any beverage.

Warning

All forms of Vitamin K may interact with blood thinning medications. If you are taking such medicines, please consult your physician before taking this product.

Caution

Do not consume this product if you are pregnant or nursing.
